

# **IBC Heating Jackets with Digital Control**

# IBC Heater / Power Blanket / Heat Blankets/ IBC Tote Blanket / Container Heater / Tote Heater

Argus Heating design, manufacture, and distribute a range of IBC and Drum Heaters. The IBC Heating Jacket is specifically designed to heat the contents of an IBC, reduce the viscosity of products or melt solids so they are pourable. The Jacket is now fitted with a compact Digital Temperature Controller, providing easy to use, yet precise, temperature control. An Insulated Top Cover Lid with centre opening is also available. Custom design service available for non-standard size IBC's.

Other products in the range

## **Applications**

Typically used to heat:

- Greases
- Fats
- Adhesives
- Cosmetics
- Juice concentrates

- Oils
- Paints
- Coatings
- Chemicals

### **Features**

IBC Heating Jackets suit most IBC designs. Each heating circuit in the Jacket is controlled by a Digital PID Temperature Controller, providing precise control from 0 - 90°C.

Manufactured in accordance with LVD2014/35/EU and tested in accordance with AS/NZS3760-2010+A2.

The approximate warm-up duration is 48 hours to raise a 1000L drum of water from +15°C to +50°C with a 2 x 1000W Jacket with the Insulated Lid fitted.

The Insulated Lid and Waterproof Cover are sold separately.

### Construction

Superior PTFE coated polyester jacket; efficient needled polyester Insulation; custom made Silicone Heating Cable; easy quick release buckles; and 2m power cord with moulded 3-pin NZ/AUS plug.

Stock Code	Dimensions (mm) / Description	Wattage (W)	Voltage (V)
HC103 (ex-stock)	4400 x 1000	2 x 1000	230
HC202	4400 x 1000	2 x 1000	110
HC104	4400 x 1000	3 x 1000	230
HC105	4400 x 1000	1300	230
HC203	4400 x 1000	1300	110
FAB005 (ex-stock)	1200 x 1000 x 150, Insulated Lid with opening		
FAB007 (ex-stock)	1200 x 1000 x 1100, Full Waterproof Cover, Heavy Duty PVC
