

Ceramic or Porcelain Radiator Rods

Porcelain Rods / Ceramic Rods / Infrared Radiator Rods
Ceramic or Porcelain Infrared Rod Radiators

Argus Heating design and manufacture a range of Radiator Rods. These rods produce infrared heat which is an effective heating source in intermittent applications and when the air temperature is low. We hold a range of materials in stock, allowing Argus Heating to design a custom Radiator Rod to suit your application.

Applications

Typically used for:

- Drying Processes
- Industrial Equipment
- Replacement elements

Features

Infrared heat travels large distances, warming objects in its path rather than the surrounding air.

Strong and durable ceramic supports tolerate moderate vibrations.

Horizontally or vertically mounted.

Long operating life.

Custom wattages and sizes can be made to order.

Construction

Resistance heating wire, porcelain or ceramic rods and supports.
