

Infrared Heating Elements

Ceramic Infrared Heat Elements / Quartz Infrared Heaters / Infrared Heating Elements / Infrared Radiant Heaters / Quartz Tube Heaters / Ceramic Rod Infrared Heaters

Argus Heating design, manufacture and distribute Infrared Heating Elements to fit a wide variety of Infrared Heaters. A large range of Infrared Heating Elements are available ex-stock or can be custom-made to suit your application. Argus Heating also repair Quartz Tube, Ceramic Tube and Ceramic Rod Infrared Heaters.

Applications

Typically used for:

- Bathrooms
- Patios
- Workstations
- Process Heating
- Paint Drying
- Paper Drying
- Laminating and Print Drying
- Toaster and Grill Elements
- Adhesive Activation
- Vacuum Forming
- Thermoforming
- Laboratory Still Elements

Features

Infrared heat travels large distances, warming objects in its path rather than the surrounding air.

High-purity quartz tube, minimising heat transmission losses.

Long operating life.

Fast heat-up time.

Exact replacements available for most brands of heater.

Custom wattages and sizes can be made to order.

Construction

Coiled resistance wire, quartz tube, with brass, ceramic or nickel-plated steel end caps.

Please contact Argus Heating to discuss your application and heating needs.
